# INDEX TO VOLUME LII

ADENINE nucleotide, 193.

BALDWIN, W. M. The artificial production of monsters demonstrating localized defects as the result of injury from X-rays, 296.

BAROTT, H. G. See LANGWORTHY and BAROTT, 400.

BELT, A. E., H. P. SMITH and G. H. WHIPPLE. III. Factors concerned in the perfusion of living organs and tissues. Artificial solutions substituted for blood serum and the resulting injury to parenchyma cells, 101.

——. See SMITH, BELT and WHIPPLE, 54.

——. See WHIPPLE, SMITH and BELT, 72.

BERGEIM, O. See MILLER, BERGEIM, REHFUSS and HAWK, 1, 28.

——. See MILLER, FOWLER, BERGEIM, REHFUSS and HAWK, 248.

Bile formation, effect of gland extracts on, 498.

Blood plasma, regeneration of proteins of, 54.

—— pressure, capillary, in man, 136.

—— ——, effect of gland extracts on, 498.

—— proteins, relation of, to shock, 72.

Brain volume, effect of stammering on, 168.

BURGE, W. E. The effect of acids, alkalies and salts on catalase production, 364.

CAPILLARY blood pressure in man, 136.

Carbohydrate tolerance in Eck fistula and hypophysectomized animals, 233.

Catalase production, effect of acids, alkalies and salts on, 364.

COLLIP, J. B. The sub-arachnoid and intra-arterial administration of sodium bicarbonate and other electrolytes, 483.

DANZER, C. S. and D. R. HOOKER. Determination of the capillary blood pressure in man with the micro-capillary tonometer, 136.

Digestion, influence of tea, coffee and cocoa on, 28.

DOWNS, A. W. The influence of internal secretions on blood pressure and the formation of bile, 498.

EDMUNDS, C. W. The character of the sympathetic innervation to the retractor penis muscle of the dog, 395.

EDWARDS, D. J. Segmental activity in the heart of the Limulus, 276.

——. The arterial pressure curve as influenced by the occlusion of certain vascular areas and by histamine, 284.

Electron tube amplification with the string galvanometer, 409.

Energy expenditure in household tasks, 400.

Epinephrin output and rate of denervated heart, 304.

—— ——, measurement of, 521.

Ergographic response, effect of tobacco-smoking on, 132.

FORBES, A. and C. THACHER. Amplification of action currents with the electron tube in recording with the string galvanometer, 409.

FOWLER, H. L. See MILLER, FOWLER, BERGEIM, REHFUSS and HAWK, 248.

GASTRIC juice, psychic secretion of, 1.
—— response to foods, 1, 28, 248.
Gastrin bodies, chemical studies on, 508.
Gland extracts, effect of, on bile formation, 498.
GOLDMAN, A. See GRANT and GOLDMAN, 209.
GRANT, S. B. and A. GOLDMAN. A study of forced respiration: experimental production of tetany, 209.
Growth, effect of splenectomy on, 562.
—— of children, seasonal variation in, 121.

HAWK, P. B. See MILLER, BERGEIM, REHFUSS and HAWK, 1, 28.
HAWK, P. B. See MILLER, FOWLER, BERGEIM, REHFUSS and HAWK, 248.
Heart, denervated, epinephrin output and, 304, 521.
—— of Limulus, segmental activity in, 276.
HENN, S. C. The effect of splenectomy upon growth in the young, 562.
Histamine, influence of, on pulse curve, 284.
HOOKER, D. R. See DANZER and HOOKER, 136.
HOOVER, D. H. See PEARCE and HOOVER, 472.

INNERVATION, sympathetic, of retractor penis muscle, 395.
Intra-arterial injection of sodium bicarbonate, 483.

JACOBSON, C. A study of the carbohydrate tolerance in Eck fistula and hypophysectomized animals (posterior lobe removal). Liver function in the metabolism of sugars, 233.
JONES, W. The action of boiled pancreas extract on yeast nucleic acid, 203.
JONES, W. The chemical constitution of adenine nucleotide and of yeast nucleic acid, 193.

KEETON, R. W. See KOCH, LUCKHARDT and KEETON, 508.
KOCH, F. C., A. B. LUCKHARDT and R. W. KEETON. Gastrin studies. V. Chemical studies on gastrin bodies, 508.

LANGWORTHY, C. F. and H. G. BAROTT. Energy expenditure in household tasks, 400.
LUCKHARDT, A. B. See KOCH, LUCKHARDT AND KEETON, 508.

MICRO-CAPILLARY tonometer, 136.
MILLER, R. J., O. BERGEIM, M. E. REHFUSS and P. B. HAWK. Gastric response to foods:
X. The psychic secretion of gastric juice in normal men, 1.
XI. The influence of tea, coffee and cocoa upon digestion, 28.
——, H. L. FOWLER, O. BERGEIM, M. E. REHFUSS and P. B. HAWK. The gastric response to foods. XII. The response of the human stomach to pies, cakes and puddings, 248.
Monsters, production of, by X-ray, 296.
Muscle, retractor penis, sympathetic innervation of, 395.

PALMER, W. L. The importance of vagal and splanchnic afferent impulses on the onset and course of tetania parathyropriva, 581.
PEARCE, R. G. and D. H. HOOVER. Variations in the respiratory dead air space due to changes in the depth of breathing, 472.
Perfusion of living organs, factors concerned in, 101.
Permeability of placenta for adrenalin, 377.

Placenta, permeability of, for adrenalin, 377.
Plasma proteins, stabilizing value of, 72.
PORTER, W. T. The seasonal variation in the growth of Boston school children, 121.
Proteins of blood plasma, regeneration of, 54.
Pulse curve after histamine and vascular occlusion, 284.

RAPHAEL, T. Certain changes noted in ergographic response as a result of tobacco-smoking, 132.
REHFUSS, M. E. See MILLER, BERGEIM, REHFUSS and HAWK, 1, 28.
——. See MILLER, FOWLER, BERGEIM, REHFUSS and HAWK, 248.
Respiration, forced, tetany following, 209.
Respiratory dead space, variations in, 472.
ROBBINS, S. D. A plethysmographic study of shock and stammering in a trephined stammerer, 168.
ROGOFF, J. M. See STEWART and ROGOFF, 304, 521.

SEASONAL variation in growth of children, 121.
Segmental activity in heart of Limulus, 276.
SHIMIDZU, Y. On the permeability of the placenta for adrenalin in the pregnant rabbit and albino rat, 377.
Shock, relation of blood proteins to, 72.
SMITH, H. P., A. E. BELT and G. H. WHIPPLE. I. Rapid blood plasma protein depletion and the curve of regeneration, 54.
——. See BELT, SMITH and WHIPPLE, 101.
——. See WHIPPLE, SMITH and BELT, 72.
Sodium bicarbonate and other electrolytes, injection of, 483.
Splenectomy, effect of, on growth, 562.
Stammering, effect of, on brain volume, 168.
STEWART, G. N. and J. M. ROGOFF. Essentials in measuring epinephrin output with further observations on its relation to the rate of the denervated heart, 521.
—— —— ——. The relation of the epinephrin output of the adrenals to changes in the rate of the denervated heart, 394.
Sub-arachnoid injection of sodium bicarbonate, 483.
Sugars, liver function in metabolism of, 233.

TETANY following forced respiration, 209.
——, relationship of nervous irritation to, 581.
THACHER, C. See FORBES and THACHER, 409.
Tobacco-smoking, effect of, on ergographic response, 132.

VASCULAR occlusion, pulse curve after, 284.

WHIPPLE, G. H., H. P. SMITH and A. E. BELT. II. Shock as a manifestation of tissue injury following rapid plasma protein depletion. The stabilizing value of plasma proteins, 72.
——. See BELT, SMITH and WHIPPLE, 101.
——. See SMITH, BELT and WHIPPLE, 54.
X-RAY, production of monsters by, 296.

YEAST nucleic acid, 193, 203.
